

EXPENDITURES FOR BARRACKS AND QUARTERS.

LETTER

FROM

THE SECRETARY OF WAR,

TRANSMITTING

In compliance with the resolution of the 11th January last, a report and statement of the expenditures for barracks and quarters for the army during the last ten years.

FEBRUARY 15, 1859.—Referred to the Committee on Military Affairs, and ordered to be printed.

WAR DEPARTMENT, *February 15, 1859.*

SIR: I have the honor to transmit herewith a report from the Quartermaster General, with accompanying papers, communicating the information called for by the resolution of the House of Representatives of the 8th ultimo, respecting the expenditures for barracks and quarters during the past ten years, and giving his views in regard to the introduction of a more economical system in the administration of the quartermaster's department.

Very respectfully, your obedient servant,

JOHN B. FLOYD,
Secretary of War.

Hon. JAMES L. ORR,
Speaker of the House of Representatives.

QUARTERMASTER GENERAL'S OFFICE,
Washington, February 14, 1859.

SIR: In obedience to your order requiring a report, under a resolution of the House of Representatives of the 8th, and referred to this office on the 11th of last month, calling for a statement of the "money annually expended during the last ten years for barracks and officers' quarters, under the several heads of rents, construction, and repairs; the amount so expended at each post, with the sums now appropriated but unexpended for such objects, exhibiting the

posts so erected and now occupied by our troops, and the numbers at each post, and such as have been abandoned and are no longer needful for military purposes; and how far the system of erecting permanent barracks on our frontier posts should be dispensed with, and a more economical system introduced, with any other suggestion calculated, without injury to the public service, to reduce the expenditures in the quartermaster's department," I have the honor to submit papers marked A, B, and C, with the statements numbered from 1 to 10, which exhibit all the expenditures made through the quartermaster's department for the objects stated, as well from the general appropriations as from special appropriations made from time to time by Congress, during the ten years terminating on the 30th of June last.

Paper marked A is an abstract of the payments made for rents during the period stated.

B is an abstract of the whole cost during the same period of the construction of barracks, quarters, storehouses, hospitals, stables, guard-houses, and other needful buildings, not only at the new sites occupied, but of new buildings at some of the old sites, and of repairs at all the posts throughout the Union and its Territories, whether occupied by the troops or not.

C exhibits the expenditures made from special appropriations made by Congress for barracks, &c., within the period embraced by the call; and each of the statements, numbered from 1 to 10, shows separately the amount paid within a single year for rents, and for constructions and repairs, paid from the general appropriations made annually by Congress. The sums paid at any particular post, however, either for rents or for construction and repairs, are no certain indication of the cost of the post for those objects, as claims for rents and for labor and materials, at almost all points in the Union, are often presented to and paid for at this office; and materials, such as glass, nails, locks, hinges, paints, iron, steel and lumber, as well as the tools required, are often purchased at the points where they can be most readily and advantageously obtained, and sent to the posts where they are required to be used. Such articles are often purchased at and sent from Saint Louis to the posts north and west of it; and at New Orleans for posts in Texas; and at New York and San Francisco for the posts in California, Oregon and Washington, on the Pacific. In one instance, materials for cottages and storehouses for Benicia, California, were prepared, ready to be put up, in the State of Maine, and sent thence around Cape Horn to the post where they were used; by that operation a considerable sum was saved to the treasury.

D is a list of the posts established within the ten years, including June last, in addition to which Indianola, in Texas, Fort Brooke, in Florida, and Nebraska City, in Nebraska Territory, were occupied as depots.

The sums paid for rents in the ten years, on all accounts, amount to \$1,338,201 12, as will be seen by reference to paper marked A, and the detail under the head of rents in the accompanying statements.

The sums paid for construction and repairs amounted in the ten years to \$4,463,399 91, as will be seen by reference to papers B and C, and the details under the head of construction and repairs in the state-

ments numbered from 1 to 10. This appears to be a large sum when taken in the aggregate; but if the details be examined, few instances, I am persuaded, will be found in which there has been much extravagant or unnecessary expenditure, unless it be that posts may have been unnecessarily multiplied.

By reference to the paper marked D it will be seen that the posts occupied in the ten years referred to amounted to one hundred and eleven, which, with the three depots before mentioned, make a hundred and fourteen; fifty-six of these posts have been evacuated; sixteen of them will probably not be occupied again. Whether the others will be reoccupied will probably depend upon circumstances not now foreseen. As to the policy of erecting permanent barracks anywhere on our rapidly receding frontier, I think it doubtful. I would suggest that comfortable huts, to be erected by the troops themselves as winter quarters, be alone authorized under the general appropriation; and that whenever the War Department shall consider permanent barracks necessary, plans, with full specifications and detailed estimates, be submitted to Congress, and a special appropriation in each case be asked for, and that no expenditure be allowed until Congress shall have granted the appropriation required; and in no instance should any sites be occupied either for huts or for permanent barracks unless there be an abundant supply of wood, water, and grass at hand.

In regard to the reduction of the expenses of the army, paid through the quartermaster's department, I, as well as other officers of the department, must have more authority than we now possess, and more control over the disposition of the money and property for which we are accountable, if any reduction is to be made by administration. As to the objects of expenditure, they are controlled by others. The great increase of expense through this department has been in forage and transportation. By reducing the number of animals in service, the cost of forage will be reduced; and by either avoiding the numerous movements of the troops, or withdrawing them from the outposts, and bringing them nearer to the sources of supply, the cost of transportation will be reduced; but in either event the efficiency of the service would probably be lessened.

As to the appropriations for barracks and quarters, there remains unexpended \$15,000 for repairs at Baton Rouge; and there is in the treasury a balance of about \$572,000, one-half of which it is estimated will be required to settle the accounts of officers, and the remainder will be required for expenditure before the close of the year.

I return the resolution of the House and the letter of the honorable chairman of the Committee on Military Affairs.

And I have the honor to be, sir, your obedient servant,

TH. S. JESUP,
Quartermaster General.

Hon. JOHN B. FLOYD,
Secretary of War, Washington, D. C.
